

```
The quotient of 5/3 is: 1
The remainder of 5/3 is (5%3): 2
```

lab1_q3.c

Print the time table for the lecture hours of your course as follows (use tabs):

```
cs140, W2013, lecture schedule:
```

```
+-----+
Day      Start time      End time
+-----+
Tuesday   4:00 pm         5:20 pm
Thursday  4:00 pm         5:20 pm
+-----+
```

lab1_q4.c

Read a float number (with any number of decimal digits), round it to the precision of only two decimal points and print the result: (use the specifier %.2f in printf, is there an issue with the rounding?)

lab1_q

Hints:
