

## 60-100 Group Assignment #1 – 11<sup>th</sup>/12<sup>th</sup> September 2014

The purpose of this group assignment is to help students learn how to use the Ubuntu Linux compute servers in the School of Computer Science, how to create files containing Miranda programs, and how to execute Miranda programs.

Begin by creating groups of 4 or 5 students and complete the GROUP FORM which will be handed out at the beginning of the lab. Submit one copy of the form to the lab instructor, and fill in a form for each member of the group.

After you have completed the group form, the instructor will take you to the computer lab in room 3119 on the 3<sup>rd</sup> floor of Erie Hall.

NOTE: If you have not yet activated your computing account, go to the following web site, using a computer/terminal of one of your group members (if one has an active account), or ask one of the teaching assistant to use their computer/terminal.

<http://www.uwindsor.ca/userid>

and click on the “students activate your user account” icon, and follow the instructions. Then use the page to activate your account.

Hopefully, at least one student in your group has activated, or can activate, their account and can log in to the CS servers in the lab.

Now, as a group, follow the instructions on the handout “How to create and run Miranda programs” or follow the link “**How to create and run Miranda programs on the CS computer servers” on the 60-100 web site**”.

When everyone in the group has learnt how to create files containing Miranda programs, and how to run them, they should break up and each student should attempt to start Individual Assignment #1 (handed out in class and available on the course web site). If you cannot log on to the servers try to create the programs using paper and pencil

The instructor and the teaching assistants will help you if you get stuck.

Complete as much of Individual assignment#1 as you can in the time available for your group lab. You should complete the rest of the assignment over the next few days and hand the assignment in on Tuesday 16<sup>th</sup> September. **There is no need to use an assignment envelope.** Please print the assignment number and your name in capitals (**with your last name (family name) underlined**) at the top of the assignment (**do not** include your student identification number).

Please include the following at the bottom of your individual assignment.

**“I declare that this is my own work” followed by your signature.**
